

To ecobrid Use

Why do chillers run in the winter as they do in the summer?
Cut electric bills up to **54%** by free cooling!

Free Cooling System

Overview The free cooling system eliminates the chiller at low ambient temperatures in the winter when cooling water requirements are low, this feature allows the water from your cooling tower to be used as direct cooling water. Controls from the chiller will ratio and improve efficiencies of the system.

Features

- Reduces power to the chiller substantially.
- Direct water supply from ecobrid (Next generation-type cooling tower) can be used to manage water quality.

※ This product is an option of ecobrid.

1

Getting Rid of Wasted Energy

● This is actual result of saved energy by Free Cooling System
