

During Resin Conveyance

Metallic foreign material contamination is a risk when molding. Remove iron metal contamination material that can adhere to the resin.

Magic Catch

Overview This is metal removal by magnet. This removes scraps of iron such as bolt, washer, and nail by simple installation in the material convey hose and protects screw and cylinder for injection molding, extruder, and midair injection-molding machine.

- Features**
- Collective of abrasion powder of iron, stainless steel (part) of iron system alloy.
 - This is a superpower magnet with maximum magnetic flux density of 13000 gauss.
 - Removal of the metallic foreign material is easy because it is installed in the material convey hose.

6

Eliminating Contamination

■ **Magic Catch** it's works reasonably with a magnet bar

■ 13,500gauss magnetic force
(residual magnetic flux density)

■ easy maintenance

Matsui, your Plastic molding partner for resource reduction, propose to achieve 'factor 4' in molding factories.
We aim to increase productivity by 4times by achieving the following, 'Save Water', 'Save Resin s' and 'save Energy'.
