

For Scrap Recycling

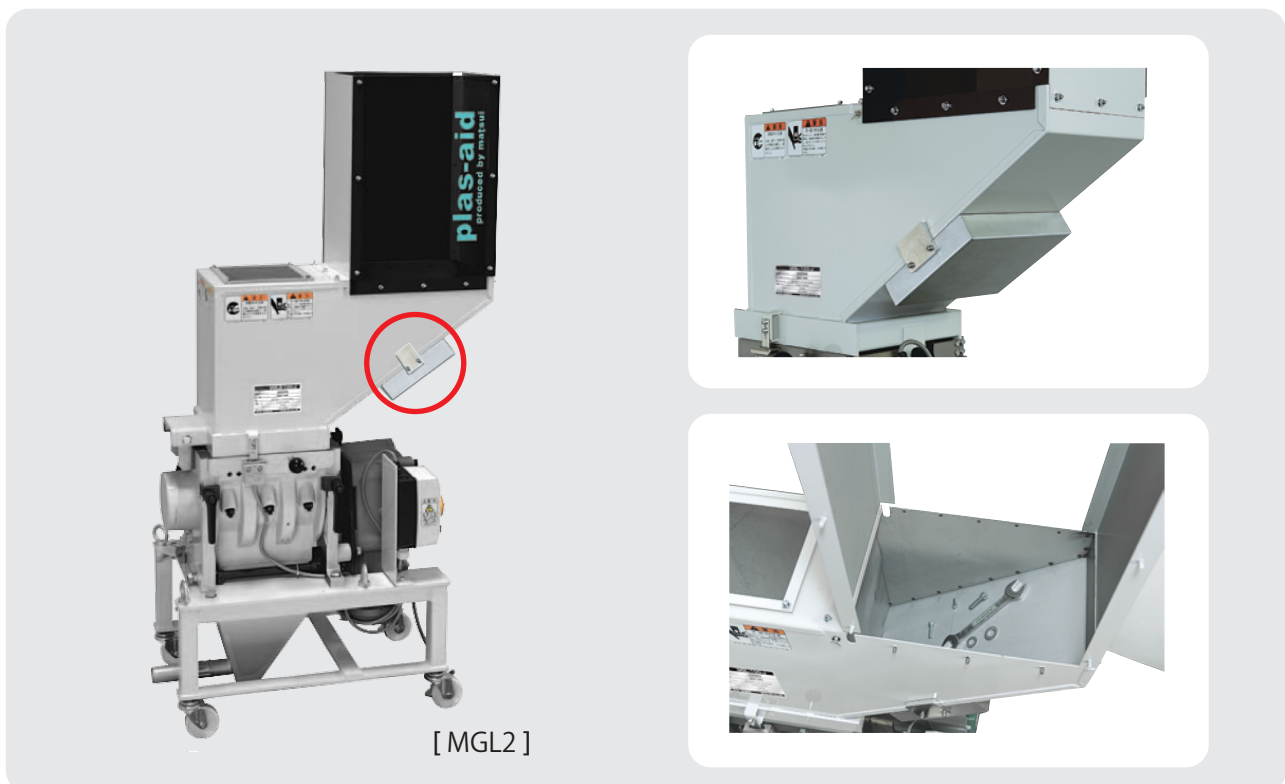

Metal contamination in granulator is bad.

Catch iron foreign material at sprue feed hopper!

## Tetsu Pita (Magnetic Sheet)

6

**Overview** Installs this in base of sprue runner feed hopper to catches foreign iron material by magnetic force. Protects the granulator cutter and screw and barrel of injection-molding machine against foreign material. This is available as option for Matsui's low-speed granulator.

**Features**

- Screw and nut design to catch with powerful magnet.
- ※Option For Granulator
- ※Because the feed hopper must be strengthened, it is only available for new and not existing units.
