

## T-Type Feed Pipe During

Resin Conveying Minimize foreign material risk.

Reduce foreign material risk by using pellet protection pipe!

## T-Type Feed Pipe During

**Overview** This is to avoid abrasion in feeding pipe part by glass filled material. It prevents contamination of metallic foreign material in the material line caused by abrasion.

[TSL]

[TN]

[TN-38MVH2-MEC]

**Features** · Material is intentionally left in the T-type elbow portion to cushion the crashing of material.

# 6

## Eliminating Contamination
