

## Water Pipes And Heat Exchangers

The efficiency of a whole factory declines as corrosion builds in pipes.

Keep water pipes clean and clear with the ecobrid.

### Dry cooler (ecobrid)

**Overview** The **ecobrid** cooling Tower is the next generation of self contained cooling towers. There are no water quality issues with the self contained cooling towers. The heat exchanger using the air-cooling specification uses no direct water.

[ ecobrid ]

- Features**
- Free cooling system saves energy consumption.
  - No need for cooling water to be sprayed on the heat exchanger.
  - Water in unit is automatically collected during warm air periods and prevents freezing, when temperatures are below 0°C.
  - We suggest total water system which is the ecobrid cooling tower.

# 7

## Solving Water Quality Issues

### ecobrid

#### ● Adiabatic Chamber

#### ● Hi absorptivity Filter (Three Years After)

**factor4** Doubling Wealth, Halving Resource Use  
in molding factories

Matsui, your Plastic molding partner for resource reduction, propose to achieve 'factor 4' in molding factors.  
We aim to increase productivity by 4times by achieving the following, 'Save Water', 'Save Resin s' and 'save Energy'.
