

How Matsui dryers put True Precision in hog heaven...

"We found Matsui's units dried faster, eliminated splay and significantly improved quality."

*Jim Kempf, VP, True Precision,
Lancaster, PA*

True Precision, a molder of parts for motorcycles, medical products, sports and office equipment and more, needed greater agility, consistent quality and increased drying capacity.

"Before, I was always hearing dryer alarms going off," comments a frustrated Jim Kempf. "So I replaced everything with Matsui dryers and now never hear an alarm."

"My molding machines are seeing more consistent material," he continues. "Fines are removed, splay is gone and drying is fast."

Ready for drying solutions that put you in the fast lane? Call Matsui.

*Desiccant rotor
drying technology,
refined over decades
of engineering,
shortens drying
times*
