Resin self-coloring molds

Added Value UP

Having problems with color variations in the molded items? As it is directly mounted to the machine, this unit prevents separation (classification by weight) of blended materials due to conveying!

### Gravimetric Loss in Weight Feeder

#### Overview

Compact design and direct mounting to the machine allows ideal blending. No separation occurs as the blended materials are not conveyed. Blends materials using specially designed cylinder and dosing system for stable coloring without any variations.

[JCLW]

#### Features

- One-touch removable material hopper.
- Simple design makes material changes easy. Cleaning takes just 60 seconds!
- Operates by automatically calculating the optimum blend ratio to suit the amount of regrind material.
- Traceability available with data logging function. (Optional function)
