During Conveyance Of Reinforced Plastic With Glass Fiber

Convey pipe of wiry material easily wears out! Reduce foreign material risk by surface hardening processing!

Abrasion Resistant Plumbing(Kanuc Processing)

Overview

This is the hardening processing technology that is different from usual coating technology of various metallic surfaces. Hardening processing is possible because film flaking and dimensions changes are minute.

Test of plumbing abrasion:Bend pipe S.S 304 , Transportation time 10S, Discharge time 10S, Resin weight of transportation per one time 6kg, Transportation speed ≒25m/sec

Non Kanuc

Features

- This improves the surface hardness of S.S and SKD to hard metals level.
- Uniform hardening layer can be formed in thin hole because it is gas nitriding.
- There is not a toughness decline in processing because surface is rough.

7 Eliminate contamination

• Information in this catalog is current as of Augast 2021.

- The actual color of products may differ slightly from the printing in this catalog.
- Product specifications and designs are subject to changes for improvements without prior notice.
- The scope of warranty provided for Matsui MFG., Co., Ltd. machinery or devices is limited to repair or replacement of parts. Any defects of Matsui's machinery or products manufactured by using such machinery, as well as defects in product manufacturing are excluded from the warranty.

Matsui, your Plastic molding partner for resorce reduction, propose to achieve 'factor 4' in molding factors.

We aim to increase productivity by 4times by achieving the following, 'Save Water', 'Save Rasin s' and 'save Energy'.

If you are looking for a best solution...
