Prevents the contamination of iron-based contamination

Added Value UP

If metal foreign matter gets into the product, it may cause molding defects or equipment failure. Remove iron-based foreign objects with powerful magnetic force!

Metal collection Inline magnet

Overview

A super strong bar magnet with a neodymium magnet built into a stainless steel case. By installing it in the hopper or suction collector above the molding machine, it collects large objects such as bolts and washers, as well as iron powder generated by abrasion of the crushing blade, preventing damage to screws and molds and contamination of molded products.

[GR8P-NHIT]

*Image Illustration

Features

- Easy installation by simply installing it inside the molding machine hopper or suction collector.
- With a strong magnetic force of 10,500 gauss, it catches iron-based metallic foreign objects.
- No electricity or air required and can be used semi-permanently.
- Heat resistant up to 180°C.

- The actual color of products may differ slightly from the printing in this catalog.
- Product specifications and designs are subject to changes for improvements without prior notice.
- The scope of warranty provided for Matsui MFG., Co., Ltd. machinery or devices is limited to repair or replacement of parts. Any defects of Matsui's machinery or products manufactured by using such machinery, as well as defects in product manufacturing are excluded from the warranty.

factor4
in molding factories

Doubling Wealth,
Halving Resource Use

Matsui, your Plastic molding partner for resource reduction, propose to achieve 'factor 4' in molding factories.

We aim to increase productivity by 4times by achieving the following, 'Save Water', 'Save Resin s' and 'save Energy'.

If you are looking for a best solution...
