For Lesser Cast Maintenance Frequency

Do you have problems with gas adhesion to the die? Cast maintenance cycle is extended by absorbing the resin gas!

Die Degassing Apparatus

Connect the tube to the die gas vent and absorb the gas generated at resin injection.

By reducing the gas adhesion to the die, the maintenance cycle is extended and a stable production rate is maintained.

Features

- Compact design for minimum space requirement.
- No troublesome operation is required as the apparatus operates based on the signals from the molding machine.
- Absorbed gas is filtered and no air contamination occurs.

· Information in this catalog is current as of Augast 2021.

- The actual color of products may differ slightly from the printing in this catalog.
- Product specifications and designs are subject to changes for improvements without prior notice.
- The scope of warranty provided for Matsui MFG., Co., Ltd. machinery or devices is limited to repair or replacement of parts. Any defects of Matsui's machinery or products manufactured by using such machinery, as well as defects in product manufacturing are excluded from the warranty.

Matsui, your Plastic molding partner for resorce reduction, propose to achieve 'factor 4' in molding factors.

We aim to increase productivity by 4times by achieving the following, 'Save Water', 'Save Rasin s' and 'save Energy'.
