9 Resolve problems with water quality

Equipped With plas Functions

Added Value UP

Productivity UP

Resource consumption cut

Molding efficiency declines as scale and corrosion build in cooling pipes. Water quality issues are solved through the use of a water-cooled chiller.

Water Cooled Chiller System

Water inside the tank of your chiller and the impurities are reduced by closed circulation, and prevents water quality issues. There is no issue of scale adhesion to heat exchange machine by air-cooled systems.

- Energy savings in low load situations are realized by the inverter control of the compressor.
- · Controller is equipped with an energy saving indicator.
- Supports a wide range of temperatures between 5-35°C.
- Maintenance issues are reduced with double pipe-type condenser.

Information in this catalog is current as of Augast 2021.

- The actual color of products may differ slightly from the printing in this catalog.
- Product specifications and designs are subject to changes for improvements without prior notice.
- The scope of warranty provided for Matsui MFG., Co., Ltd. machinery or devices is limited to repair or replacement of parts. Any defects of Matsui's machinery or products manufactured by using such machinery, as well as defects in product manufacturing are excluded from the warranty.

Matsui, your Plastic molding partner for resorce reduction, propose to achieve 'factor 4' in molding factors.

We aim to increase productivity by 4times by achieving the following, 'Save Water', 'Save Rasin s' and 'save Energy'.

If you are looking for a best solution...
